Profile

I'm a MERN Stack Web Developer and UX/UI Designer specializing in building modern, scalable, and high-performance web applications. I create fast, responsive, and user-centered front-end experiences using React.js (Next.js) and Tailwind CSS, with a strong focus on wireframing, prototyping, and usability.

On the back-end, I primarily work with Node.js, building efficient and scalable applications using Express.js and MongoDB. I design secure, well-structured RESTful APIs and services, while also having experience with Django (Python) when needed. Additionally, I have hands-on experience with AWS-based DevOps practices.

I also integrate Generative AI and LLM-powered solutions into applications to enhance functionality and user experience.

I'm passionate about combining front-end, back-end, DevOps, and AI to build efficient, intelligent, and user-focused digital products.

Experience

MEAN Stack developer	03/2026 – Present
National Telecommunication Institute (NTI), Zagazig	

Web Developer	10/2025 – 01/2026
ITIDA GIGS, Freelancer	

Education

Bachelor of Science in Computer Science	10/2021 – 06/2025
Zagazig University, Zagazig	
V.Good	

Skills

Front-End Development using React.js

HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Redux

UX/UI Design

Figma, Adobe Illustration, Adobe InDesign, Adobe Photoshop, wireframing, prototyping, user flows, usability testing, Responsive & Cross-Browser Design.

Version Control & Collaboration

Git, GitHub, Agile & CI/CD workflows.

Back-End Development

RESTful APIs using Python (Django), MySQL, and MariaDB for the Database Postman, Express.js, MongoDB, Node.js.

Languages

English

Projects

Pulse Of Life.

- Frontend: HTML5, CSS3, and Bootstrap for responsive and clean UI design, Backend: Django
- Framework for building a robust and scalable server-side application, handling routing, business logic, authentication, and API integration. Database: MariaDB for reliable, high-performance relational data storage and management, ensuring secure and efficient queries.

Integral Hub

- IntegralHub is a smart home mobile application designed to provide seamless control and
- monitoring of connected devices in real time. It offers intuitive navigation, personalized
- dashboards

TravelBloom

- Front-End project about encouraging of exploration of unknown territories, embracing diverse
- cultures and landscapes, while pursuing the avid dreams that captivate the soul and ignites a
- sense of wonder.

TechNest (E-commerce)

- TechNest is an E-commerce full stack web app built with MERN tech (MongoDB, Express.js,
- React.js, Node.js) for selling technical products such as mobiles, tablets, TVs and so on.

Certificates

JavaScript Programming Essentials from IBM

McKinsey.org Forward Program from McKinsey & Company

- This program enables participants to develop practical skills for success in the future of work.
- Participants learn how to apply the McKinsey approach to problem-solving, become more effective and influential communicators and develop adaptable and resilience mindsets.

Learning REST APIs from LinkedIn Learning

MERN Stack Front To Back: Full Stack React, Redux & Node.js from Packt

- Build and deploy a full-stack web application using the MERN stack. Set up and manage a
- MongoDB database with Express and Mongoose. Implement user authentication and
- authorization using JWT. Use Redux to manage global application state and streamline
- frontend development.

AWS 1: Intro to Cloud Computing from Manara

Freelance web developer from ITIDA GIGS

UX & UI Diploma from Array

Fundamentals of UI/UX Design from Microsoft

DevOps and AI on AWS: Upgrading Apps with Generative AI from AWS
